

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A data processing apparatus comprising:

means for initiating saving in response to one click of a single button, said means for initiating saving being capable of initiating saving one of either a content of an Internet page ~~content~~ displayed by a browser ~~or a URL of the page~~;

means for acquiring ~~one of either the content or the URL~~ of the currently displayed page from the browser ~~based on an instruction by said means for initiating saving~~;

means for indexing, said means for indexing assigning a predetermined index to data acquired by said means for acquiring; and

means for data saving the acquired data with the assigned index in a predetermined storage unit.

2. (Canceled)

3. (Currently Amended) The apparatus according to claim 1, wherein said means for acquiring obtains the URL of the currently displayed page and said means for indexing assigns a ~~predetermined index to the URL or a selected part thereof~~ to the data as the predetermined index.

4. (Currently Amended) The apparatus according to claim 1, wherein said means for acquiring obtains one of either a keyword or a title embedded in a page displayed in said

browser, said means for indexing assigning a ~~predetermined index~~ to the keyword or the title to the data as the predetermined index.

5. (Currently Amended) The apparatus according to claim 4, further comprising means for displaying one of either the keyword or the title acquired by said means for acquiring ~~in a menu used by said means for initiating saving~~.

6. (Original) The apparatus according to claim 1, wherein the index includes a time when the data is saved.

7. (Original) The apparatus according to claim 1, further comprising:
means for sorting indices of the data in the storage unit; and
means for displaying a result of the sorting by said means for sorting.

8. (Currently Amended) The apparatus according to claim 7, further comprising means for ~~designating~~ selecting an index from the indices displayed on said means for displaying.

9. (Currently Amended) The apparatus according to claim 8, further comprising:
means for initiating deletion of a the selected index; and
means for deleting the selected index, said deleting based on an instruction from said means for initiating deletion.

10. (Original) The apparatus according to claim 9, wherein said data to which the selected index is assigned is maintained in the predetermined storage unit.

11. (Original) The apparatus according to claim 9, wherein said data to which the selected index is assigned is removed from the predetermined storage unit.

12. (Original) The apparatus according to claim 9, wherein said means for initiating deletion selects an instruction from a menu displayed, said selection in response to a user-action.

13. (Original) The apparatus according to claim 12, wherein said user action is a click of mouse button, said apparatus being capable of recognizing said click.

14. (Currently Amended) The apparatus according to claim 8, further comprising means for displaying a URL of the data to which the ~~designated~~ selected index is assigned.

15. (Currently Amended) The apparatus according to claim 8, further comprising means for informing whether the content of the page to which the ~~designated~~ selected index is assigned has been saved.

16. (Original) The apparatus according to claim 15, wherein said means for informing is configured to further provides information regarding time of saving content.

17. (Original) The apparatus of claim 1, wherein said means for indexing assigns said index automatically.

18. (Original) The apparatus of claim 1, further comprising a means for retrieving data from said a predetermined storage unit.

19. (Original) The apparatus of claim 18, wherein indices of said retrieved data are displayed to a user in accordance with the time of creation of said data associated with said indices.

20. (Original) The apparatus of claim 18, wherein indices of said retrieved data are displayed to a user in accordance with organization name associated with data.

21. (Original) The apparatus of claim 18, wherein indices of said retrieved data are displayed to a user in accordance with keywords of said data.

22. (Original) The apparatus of claim 18, wherein indices of said retrieved data are displayed to a user in a sorted order of domain names of Internet locations where said data was initially obtained.

23. (Original) The apparatus of claim 18, wherein selecting an index to retrieve stored data causes said data to be displayed in a browser window actively being used.

24. (Currently Amended) A method for processing data in response to a user, comprising:
initiating saving a content of an Internet page displayed by a browser, in response to one click of a single button;

acquiring ~~one of either~~ the content ~~or URL information~~ of the currently displayed page from the browser;

assigning a predetermined index to data acquired by said means for acquiring; and

saving the acquired data with the assigned index in a predetermined storage unit, ~~said data comprising one of either said content or said URL information.~~

25. (Original) The method according to claim 24, further comprising receiving an instruction for activating saving of one of either the content or the URL of the currently displayed page.

26. (Currently Amended) The method according to claim 24, wherein said acquiring comprises obtaining the URL of the currently displayed page and said assigning a ~~predetermined index~~ comprises assigning ~~said predetermined index~~ to the URL or a selected part thereof to the data as the predetermined index.

27. (Currently Amended) The method according to claim 24, wherein said acquiring results in obtaining of one of either a keyword or a title embedded in a page displayed in said browser, said indexing assigns the keyword or the title to the data as the predetermined index.

28. (Original) The method according to claim 27, further comprising displaying one of either the keyword or the title acquired.

29. (Original) The method according to claim 24, wherein the index includes a time when the data is saved.

30. (Original) The method according to claim 24, further comprising:
sorting indices of the data in the storage unit; and
displaying a result of the sorting on a display device.

31. (Currently Amended) The method according to claim 30, further comprising
~~designating~~ selecting an index from the indices displayed.

32. (Currently Amended) The method according to claim 31, further comprising:
initiating deletion of a the selected index; and
deleting the selected index in response to said initiating deletion.

33. (Original) The method according to claim 32, wherein said data to which the selected index is assigned is maintained in the predetermined storage unit.

34. (Original) The method according to claim 32, wherein said data to which the selected index is assigned is removed from the predetermined storage unit.

35. (Original) The method according to claim 32, wherein said initiating deletion results in selection of an instruction from a menu displayed to a user, said selection in response to a user-action.

36. (Original) The method according to claim 35, wherein said user-action is a click of mouse button.

37. (Currently Amended) The method according to claim 31, further comprising displaying a URL of the data to which the ~~designated~~ selected index is assigned.

38. (Currently Amended) The method according to claim 31, further comprising informing whether the content of the page to which the ~~designated~~ selected index is assigned has been saved.

39. (Original) The method according to claim 38, wherein said informing further provides information regarding time of saving content.

40. (Original) The method of claim 24, wherein said index is assigned automatically.

41. (Original) The method of claim 24, further comprising a means for retrieving data from said a predetermined storage unit.

42. (Original) The method of claim 41, wherein indices of said retrieved data are displayed to a user in accordance with the time of creation of said data associated with said indices.

43. (Original) The method of claim 41, wherein indices of said retrieved data are displayed to a user in accordance with organization name associated with data.

44. (Original) The method of claim 41, wherein indices of said retrieved data are displayed to a user in accordance with keywords of said data.

45. (Original) The method of claim 41, wherein indices of said retrieved data are displayed to a user in a sorted order of domain names of Internet locations where said data was initially obtained.

46. (Original) The method of claim 41, wherein selecting an index to retrieve stored data causes said data to be displayed in a browser window actively being used.

47-58. (Canceled)
